

PYTHON – WORKSHEET 1

Q1 to Q8 have only one correct answer. Choose the correct option to answer your question.

1. Which of the following operators is used to calculate remainder in a division?

- A) # B) & C) % D) \$

ANSWER : C) %

2. In python 2//3 is equal to?

- A) 0.666 B) 0 C) 1 D) 0.67

ANSWER : B) 0

EXPLANATION : Single division sign will give you decimal value, means value after point ie. 0.666 but Double Division sign will give not give you decimal value. It will show value before point ie. 0

3. In python, 6<<2 is equal to?

- A) 36 B) 10 C) 24 D) 45

ANSWER : C) 24

EXPLANATION : Here, << indicate the multiplication with the value itself after that sign, means from the above example <<2. Here $2*2=4$ and then multiply with value before << this sign, means $6*4=24$.

4. In python, 6&2 will give which of the following as output?

- A) 2 B) True C) False D) 0

ANSWER : A) 2

EXPLANATION : Here Binary representation of 6 is 110 and 2 is 10. (&) operator is to SET 1 IF BOTH BITS ARE 1, representation between them is 10 and it is binary representation of 2. So answer is 2.

5. In python, 6|2 will give which of the following as output?

- A) 2 B) 4 C) 0 D) 6

ANSWER : D) 6

EXPLANATION : (|) operator sets one or two bits of 1 is 1. So $6 = 110$, $2 = 10$, representation between them will 110 and it is binary representation of 6. So answer is 6.

6. What does the finally keyword denotes in python?

- A) It is used to mark the end of the code

- B) It encloses the lines of code which will be executed if any error occurs while executing the lines of code in the try block.
- C) the finally block will be executed no matter if the try block raises an error or not.
- D) None of the above

ANSWER : Option : B)

7. What does raise keyword is used for in python?

- A) It is used to raise an exception. B) It is used to define lambda function
- C) it's not a keyword in python. D) None of the above

ANSWER : A) It is used to raise an exception

8. Which of the following is a common use case of yield keyword in python?

- A) in defining an iterator B) while defining a lambda function
- C) in defining a generator D) in for loop.

ANSWER : C) in defining a generator

Q9 and Q10 have multiple correct answers. Choose all the correct options to answer your question

9. Which of the following are the valid variable names?

- A) _abc B) 1abc C) abc2 D) None of the above

ANSWER : A) _abc, B) 1abc, c) abc2

10. Which of the following are the keywords in python?

- A) yield B) raise C) look-in D) all of the above

ANSWER : A) yield, B) raise
